ABOUT THE ARTIST

Amano Viktor Rencelj AVR

Amano Viktor Rencelj (born July 10, 1985), known as **AVR**, is an German Artist from Rijeka Croatia.

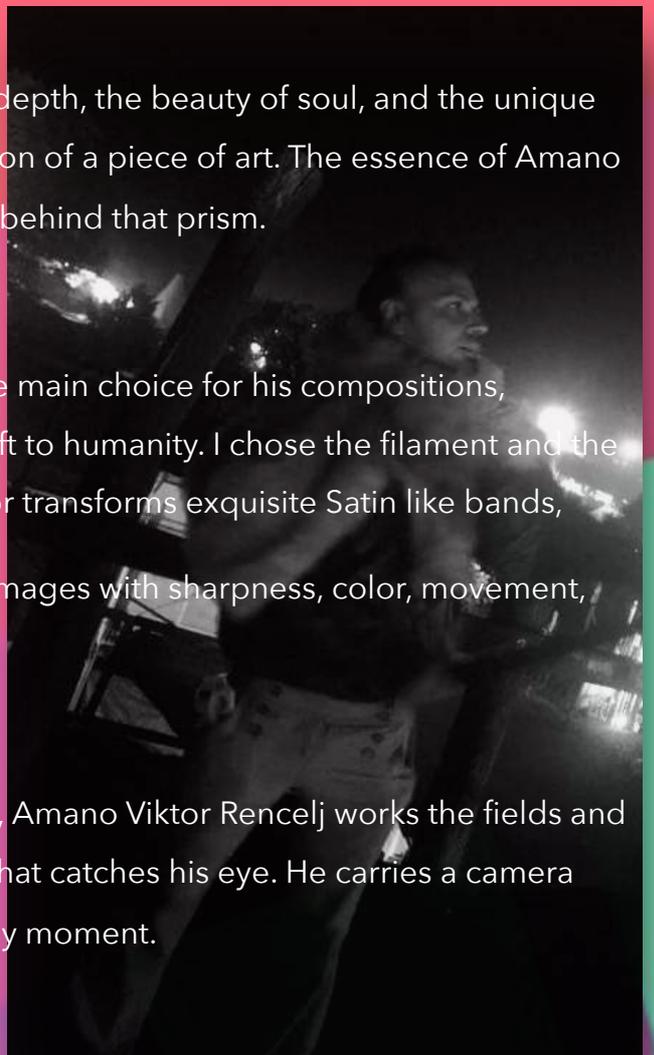

LIGHT artist, Amano Viktor Rencelj, has the profound depth, the beauty of soul, and the unique composure of a man who truly understands the creation of a piece of art. The essence of Amano Viktor Light sculpture is not the form, but the mystery behind that prism.

Although magnificent abstract and landscapes are the main choice for his compositions, AMANO explains, "As an artist, I see art as a kind of gift to humanity. I chose the filament and the red color as a conscious decision to the object." Viktor transforms exquisite Satin like bands, and dichroic polymer film into romantic, compelling images with sharpness, color, movement, flow and light.

Before he begins his artistic journey on Light & Space, Amano Viktor Rencelj works the fields and gardens near his Munich home for a flower or scene that catches his eye. He carries a camera and tablet everywhere so he can shoot a subject at any moment.

"My favorite moments are free dances, transzendent, star-shining eyes, vision moments, and places of paradise. There are others, but these I seem to come back **to my nature.**

They all have an elegance or translucency."
